

Wire Roll-Top Panel Fencing

Wire Roll-Top Panel Fencing is an extremely versatile and popular fencing solution that is suitable across a wide range of applications. GV Security Fencing offers a large selection of Wire Roll-Top Panel Fencing products made by one of Australia's leading manufacturing companies, ARC Fences.

Stylish, versatile and durable

Wire Roll-Top Panel Fencing is visually appealing which means it integrates well into both urban and rural settings. It's versatile nature means it is able to be attached to galvanised pipe, wooden posts, brick pillars, concrete and other building products.

Robust construction and hot dip galvanised finish ensures many years of faultless service. In the event of unforeseen damage, simplicity of replacement ensures restoration of panels can occur with a minimum of delay.

Wire Roll-Top Panel Fencing features an anti-scaling gap of vertical rods without horizontal hand or foot holds to present the maximum deterrent to climbers and vandals.
